Data Center Architect (EMCDCA) Specialist - Storage Service Management

Data Center Architects play a crucial role in providing domain-specific expertise to complement, expand, and complete the cloud-ready virtualized infrastructure designs. The EMCDCA training and certification is designed to build required skill sets for qualified architects and consultants.

Prerequisites

Information Storage Associate (EMCISA)

Required Exams

E20-016

Next Steps

Cloud Architect (EMCCA) Specialist - Virtualized Data Center and Cloud Infrastructure
